MATHEMATICS

Time allowed - Two nours.

Candidates must answer not more than ten quastions including at least one of the graph questions (No. 6 and No. 121

Each question has ten marks. Where a question is divided into parts, the marks for the parts are approximately equal.

1. (a) Solve $x + 2x - 35 = 3 (x + 4)^2 - 9$ (b) Solve $(x - 2)^2 + (y - 1)^2 = 5$, x - y = 4

(a) Factorise completely $4(xy - ym)^2 - (x^2 + y^2 - m^2 - n^2)^2$ (b) Factorise completely $6a^3 + 13a^2 - 14a + 3$

(b) Find the equare root of $(p+\overline{p})^2 - (p-\overline{p})^2$ (a) If n - n = 2 find the value of $n^3 - \hat{n}^3$

(b) Simplify (12p2q3)2 x q 2 x 13:

A pedestrian walked 12 miles at a certain rate, and then 6 miles farther at a rate of t mile per hour faster. If he had walked the whole distance; at the faster rate, his time would have been 20 minutes less. How long did it really take him to walk the 18 miles?

Draw the graph of y = 3x2 - 2 for values of x from -3 to + 3. Letyour scale be: 1 inch = 1 unit for the x-axis, and 1 inch = 5 units for the y-axis. Using the same scales and axes, draw also the graph of y = 5 - x.

(a) From your graphs, give the range of galues of x for which 5 - x is greater than 3x - 2;

(b) Give the values of x at the points of intersection of the two graphs, and give the equation of which these values of x are the roots in the form;

at2 + bx + ame U.

A sum of money is invested at compound interest. At the end of the first year it amounts to £15,600; and the interest added at the end of the second year is \$524. Calculate the rate per cent per annum, and the sum invested.

Three men A, B. C are partners in business. They agree to receive out of the profits 2500 per year each; the rest of the profits. are to be divided among them in the ratio 3:5:6 respectively. If the total profits in a certain year were £4440, calculate the amount each should receive.

A cylindrical container has internal diameter 24 inches, and its internal height is 3ft. 6 in. When empty, it weighs 16 lb. Find the total weight (in 1b) when full of oil, if the oil weight 462 lb. per cubic foot. Take 7 as 3.142

now many times will the oil in the container fill a hemispherical bowl of diameter 6 inches?

An author published 5000 copies or his own book. The cost was \$1.50 per copy for printing, and 80 cents per copy for binding; he also spent \$1000.00 on advertising. He sold all the copies to a bookseller, agreeing that the published price should be \$4.50 per copy, and allowing the bookseller 30% discount off the published price. The bookseller sold to the public 4000 copies at the full price, and 224 copies at half-price. The remainder were sold to a paper-mill at 25 cents each. Find

the net profit of the author, in dollars; the percentage profit of the bookseller, correct to three figures.

(a) Evaluate by logarithms, correct to three figures?

If 1 yard = 0.9144 metres, find to two significant figures the percentage error in taking an area, which is really 25 square miles, as 64 square kilometres.

Find the price of a 41% stock, if a return of 4% on money invested is obtained after paying income tax at 4 shillings in the £.

A man sold 26000 of this stock when the price had fallen to 90, and invested the proceeds in a 6% stock at 108.

> How much of the 6% stock did he buy? What was the increase in his income, arter; allowing for tax?

The diagram shows the travel graphs of two men, A and B, who start from P and Q respectively, 13 miles apart. By inspecting the given graphe, without copying them, find

the speed of A during the last section of his journey:

the average speed of B over the whole journey;

the time and place of their meeting;

at what time will A reach Q, if he continues at the same rate?

派文中舉會及陶工科

HONG KONG SCHOOL CERTIFICATE EXAMINATION: 1959 POTTERY Time allowed - Two hours

tetion I and this & atlanta.

Short answers to the specieusage

現徽 What is the difference between earthenwire, stenegare, and porcelaint

What colours do the following metal exides produce - copper exide, from exide, rine exide and manganese

What are the important factors to remember when making a glaze firing? That work can be done on a pot which is leather hard?

Give a list of three building saterials ande of clay, which has been fired Describe different ways in which glase can be applied to pottery.

Give a list of the tools and equipment you would require for throwing a pot on the potter's wheellibe how you would prepare clay which you have yourself for use in a pottery.

is meant by the alip decoration? Describe how elips Drepared, used, and store. Vere asked to make a recummentar pos, normould you do ... Illustrate your enswer.

is the purpose of glazing pottery? Hage the different ared for use.

design for a plate which is to-be decorated with colourses. The plate should be about 4" wide and the decoration the shape and decoration. Describe some of these differences
